Title author affiliation

Abstract—

- **Key results**
- **Concise Summary**
- **Should be able to be read alone**

I. INTRODUCTION

I. INTRODUCTION

- Motivation
- Physics
- Theoretical background

II. THEORY

- Do not derive anything
- Keep explanatory text between equations
- Explain all terms and symbols when stating equations

III. EXPERIMENTAL METHOD

- Do not use pen for diagrams
- Did what and why
- Uncertainties - estimated / measured

IV. RESULTS, ERRORS AND DISCUSSION

- Numerical results with uncertainty
- Dont include uncertainty formula

V. CONCLUSION

- Self contained
- Draw all parts of report together
- What can be improved
